Assignment Cyber Crime Ethics Issues

It's a group work and submit only one infographic for each group. Please be as creative as possible and , upload the assignment in ukmfolio, and email it to me *yazrina@ukm.edu.my*. *Please make sure that every group member's name and matrix number are put on the submission cover page.*

Develop a comprehensive infographic illustrating the intersection of cybersecurity and ethical considerations. Explore various ethical issues that arise in the context of cybersecurity, such as data privacy, surveillance, digital rights, cyber warfare, and access to information. Identify the ethical principles and frameworks that guide decision-making in cybersecurity practices. Utilize real-world examples and case studies to demonstrate the ethical implications of different cybersecurity strategies and technologies. Your infographics should provide a structured overview of the ethical landscape surrounding cybersecurity, highlighting key concepts, challenges, and ethical dilemmas faced by individuals, organizations, and society

What to Include in the Infographic:
   - Main categories and sub-categories
   - Key concepts, Challenges, Ethical issues, dilemmas, and conflicts
   - Case study references (especially Malaysian)
   - Visual elements: icons, colors, keywords
   - Related laws and ethical guidelines (e.g., PDPA, WIPO, GDPR)

Evaluation Criteria:

Criteria	Weight (%)
Creativity and Design	20%
Depth of Content and Research	30%
Relevance and Clarity of Examples	20%
Integration of Ethical Frameworks	20%
Structure and Organization	10%
